

DB SCHENKER **skybridge** downunder
First **plane**, then **vessel**.
Combined cost efficiency.

Use DB SCHENKER **skybridge** to build your bridge to the world markets. This intermodal transport concept combines the advantages of air and ocean freight. You tell us where from and where to, and we will take the route that best serves your needs. By providing a service that meets your deadline while reducing not only your

freight costs but also CO2 emissions compared to pure air freight shipments.

DB SCHENKER **skybridge** downunder is available from Europe via Hong Kong or Singapore to Australia and New Zealand.
www.dbschenker.com.au

Twice as fast as ocean freight and only half the price of air freight shipment.

For supply chains to Australia and New Zealand, the rule of thumb is: Air freight shipments are quick and ocean shipments are inexpensive.

DB SCHENKERskybridge downunder combines the advantages of both, ocean and air freight. This reduces transit times and freight costs by up to 50%.

Air freight? Ocean freight? Combine both...

Especially when deadlines are tight, you must choose efficient logistics:

If speed is what you want, then you're certain to choose air freight but air freight has its price

If your primary focus is on costs, then you're certain to choose ocean freight for heavy loads or large volumes but ocean freight takes time

Our solution: Integrated cost efficiency.

Use DB SCHENKERskybridge downunder to build your bridge to the world markets. This intermodal transport concept combines the advantages of air and ocean freight. You tell us where from and where to, and we'll take the route that best serves your needs. By providing a service that meets your deadline while reducing your freight costs.

DB SCHENKERskybridge downunder is available from Europe via Hong Kong or Singapore to Australia and New Zealand.
