Schenker Consulting is an advisory service for businesses.

Schenker Logistics Consulting offers logistic consulting and project management with a focus on Supply Chain Management.

Through environmental and efficiency gains, we create increased competitiveness for our clients.

Our consultants have extensive experience and are readily available to enter into logistics processes with the individual customer. The services may include analysis, investigations, counseling, provision of resources/expertise and other missions where the goal is to provide basis for improving the efficiency of the customer value chain. If necessary we can also assist with implementation of solutions.

Schenker Consulting uses advanced IT tools to contribute solutions to complex challenges within Supply Chain Management.

We provide a range of services with the objective being to enhance the customer's value chain:

- Assessment, optimization and restructuring of value added chains
- Leasing out of resources for logistic diagnose work and project management
- Gravity factors and consequence analysis
- Optimal positioning of inventory in the supply chain
- Simulation of transport flows
- Leasing out of logistic managers, transport managers, project managers and other logistic resources
- Courses and workshops

Schenker Consulting can draw on knowledge and experience from the whole of DB Schenker's network.
