Telephone: 07500

DB Schenker offers logistics and transport solutions all over the world.

DB Schenker has their own integrated network via own IT systems, traffic arrangements, transport equipment and terminal facilities. The customers can follow their shipments via tracking and mySchenker.

Information logistics includes amongst others:

- EDI
- mySchenker
- WEB-TA
- Integration services

EDI-solutions

DB Schenker offers electronic solutions with EDIFACT:

- Way bill information
- Status of transport
- Way bill receipt
- Invoice

For customers without EDI we can also offer efficient tools for administration of transport. All customers can make reservations via our website.

mySchenker

All customers receive their own website with complete information regarding their own shipments - mySchenker. The customer will then be able to follow the goods via electronic tracking as well as through the entire transport chain.

These will also show numerous statistics showing shipment development, delivery quality, news, transport schedules, etc.

The service is applicable to customers with a customer ID. User identity and password will be assigned when filling out a registration form via our website.

Schenker LIVE for domestic groupage and parcels show current information with status for all shipments and items.

WEB-TA

WEB-TA is an information system enabling the customers to create shipments, execute booking of export shipments, receive printouts of the shipments and access shipment information as well as statistics via Internet. All transport administration is done in one place. This includes address register, shipment register and booking. The system also has additional functions, import and address register, label ordering, tracking, etc. WEB-TA is supported 24/7.

Integration services

DB Schenker has several services for customers on Internet, where the customers themselves can find information related to shipments, traffic arrangements, transport schedules, tracking of parcels as well as integrated services.

Information logistics

DB SCHENKER *information logistics*

Examples on electronic services:

Active shipment information

Tracking/shipment overview with deviation:

Information on single shipments, shipments within a period and signature on way bill.

Freight list:

Overview of freight rates and additional charges for sending or receiving goods.
